

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph before the paragraph beginning at page 14, line 16 with the following:

According to Fig. 2 and Fig. 3, a hydraulic force means 11 cooperating with coupling elements 21 and 21' is provided for lifting the clamping element 7 into the gliding path 38 or for lifting it out of it. Moreover, the Figs. 2 and 3 show that the holding element 6 has two pressure plates 23, 23' at the free end of the upper, horizontal frame arm 22, that the clamping element 7 has congruent gliding plates 24, 24', that the holding element 6' has two pressure plates 37, 37', and that the clamping element 7 has congruent gliding plates 26, 26'. The clamping element 7 is slidable by force means 25, 25' on a horizontal gliding path 38 with its gliding plates 24, 24' and 26, 26' across the pressure plates 23, 23' and 37, 37' for generating a positive and non-positive coupling.
